

# SAFETY MAP, NDYS 2010 BURSA TURKIYE

School: **IMOR**

Town: **Bitola**

Country: **Macedonia**

web: [www.imor.org.mk](http://www.imor.org.mk)

## School Introduction:

IMOR is an organisation established officially in year 2000. It is focusing on empowering young people to make a difference in the world through educating them in using ICT, networking, communication skills and problem solving skills. We are focusing our activities through project work in the spirit of multicultural understanding and cooperation, civic society and democracy.

IMOR's students are very active on international field by leading and working on different project or activities.

Our students have been participating and presenting own work on a lot of international conferences. Several international awards have been received proving the success of our ideas. We have been collaborating with students from Albania, Bosnia, Bulgaria, Canada, India, Israel, Japan, Kosovo, Lebanon, Netherlands, Pakistan, Russia, Slovenia, Suriname, Taiwan, USA, and many more.

We are partnering and networking with different organisations from our country and also on international level like: iEARN, UNESCO's InfoYouth network as the only member from Macedonia, Caretakers of the Environment International, forum of CSO of Bitola city, SEGA – network of youth NGOs of Macedonia. At the same time IMOR is one of the founders of CIVIS – Association of SEE NGOs; PHILIA – Association of multiethnic cities in SEE.

## Team Introduction

We are group of students 11 and 12 years old. We think that protecting our environment is very important for our future life on Earth. That is why we choose to work on environmental projects.

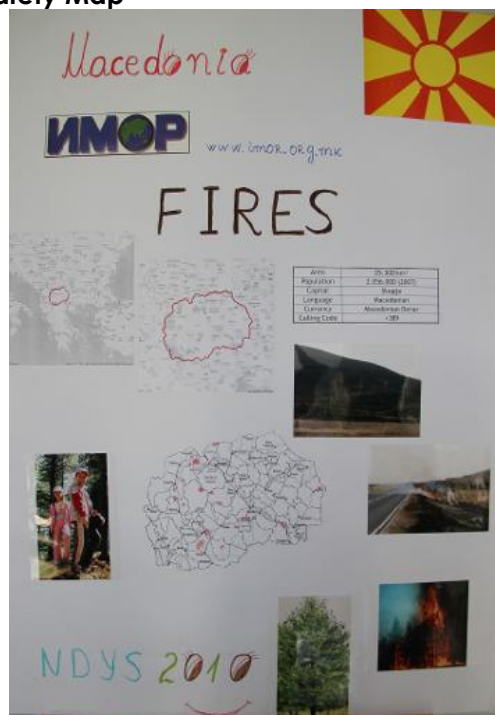

## Present Topic Outline

**Aims of the project in the short run:** To prevent fires and reduce fire damages in Macedonia.

**Aims of the project in the long run:** To prevent damages caused by fires in the region and world.

**Social aim of the project:** To increase awareness about climate change and global warming and reduce environmental problems in the world.

## Our Safety Map

## Safety Map Introduction – 1

Macedonia is landlocked country with a lot of mountains, rivers, and also fields and valleys. There are different disasters appearing in it – floods, land sliding, and rarely earthquakes. But every year during summer we cannot protect ourselves enough from fires. Because of the reach vegetation and very hot and dry weather during summer period, there are a lot of fires in different parts of the country. They sometimes have human victims, and always are causing a lot of damages and destroy our beautiful flora and fauna. That is why we decided to work on disaster we have the most – fires. The steps in our work were:

1. We chose the type of disaster we would focus on: FIRES.
2. We made a research about how fires can start and previous fires in our region.
3. We made the disaster safety map.
4. We made a plan about proposed actions to raise awareness about fire prevention.

## Share The Process of NDYS 2010

1. We collected the information about fires in our country.
2. We made a list of activities that can prevent from fires.
3. We have visited the wood and forest in our surroundings.
4. We made a presentation about fire prevention.
5. We participated in planting trees in area destroyed by previous year's fires.
